Reverse Osmosis

With our reverse osmosis drinking water system, you can have sparkling clear water straight from your tap.

Forget the daily cost of bottled water. Your coffee, tea and juice will be more flavorful. The food you prepare—like soups, sauces, fresh fruits and vegetables—will taste better. And, you'll see the difference when you look at your crystal-clear ice cubes. Our drinking water system gives you a constant supply of water at its best.

## **Residential Applications:**

*Drinking water*

*Ice cubes*

*Baby formula*

*Auto batteries*

*Cooking water*

*Steam irons*

*Humidifiers*

*Weight loss diets*

*Soups and sauces*

*Low sodium diets*

*Juices, coffee & tea*

*Aquariums*

*Pets*

*Plants*

[WaterYouDeserve.com](http://WaterYouDeserve.com)

Using reverse osmosis, the industry's most sophisticated filtration technology, our drinking water system delivers the best water possible. As water enters the system it flows through three stages of treatment to reduce dissolved solids, impurities and contaminants.

- ◆ Prefilter - Larger particles, such as silt, rust and scale, are removed by the prefilter. This extends the life of your system and allows the semipermeable membrane to attack smaller particles.
- ◆ Membrane - At the center of the system, the R.O. membrane allows hydrogen and oxygen to pass through its microscopic pores. Dissolved solids, too small to have been caught by the prefilter, are now removed from the water and flushed to the drain.
- ◆ Final polish - Water flows from the membrane to a holding tank which stores the clean water until you turn on your faucet. Before the water is dispensed it flows through one more state of filtration. An activated carbon filter removes any remaining tastes and odors, delivering to you only the freshest, cleanest water possible.

### **Fast Recovery**

The Fast Recovery System refills your tank quickly, producing enough water for all your needs.

### **Certified**

For peace of mind, your reverse osmosis system is NSF/WQA certified.

Let a water treatment professional from Desert Water Conditioning review these features in more detail and explain how the neatly the system fits under your sink and complements your kitchen.
